

Sakshi Raut

Full Stack Developer | SDE II

9172579828 | sakshiraut736@gmail.com | sakshi736.github.io/myprofile | linkedin.com/in/sakshi-raut02 | github.com/sakshi736 | Nagpur, Maharashtra

SUMMARY

Diligent Full-Stack Developer with 3+ years of experience designing and delivering scalable, secure web applications. Proficient in React, Angular, TypeScript, Tailwind CSS, Java, Spring Boot, Node.js and Python with hands-on expertise in AWS cloud infrastructure, Docker containerisation, CI/CD pipelines, REST and WebSocket APIs, and JWT/OAuth authentication flows. Proven ability to collaborate across cross-functional teams in Agile environments and translate complex technical requirements into production-grade solutions. Passionate about security-focused engineering and building reliable, user-centric platforms at scale.

TECHNICAL SKILLS

Languages:	Java, Python, JavaScript, TypeScript, C/C#, SQL
Frontend:	React.js, Angular, Vue.js, Tailwind CSS, Redux, HTML5, CSS3, AEM
Backend:	Spring Boot, Node.js, REST APIs, GraphQL, WebSocket, .NET, Frappe/ERPNext
Databases:	PostgreSQL, MySQL, MongoDB, DynamoDB, Redis
Cloud & DevOps:	AWS (EC2, S3, Lambda, API Gateway, DynamoDB), Docker, Kubernetes, CI/CD (GitHub Actions / Jenkins)
Auth & Security:	JWT, OAuth 2.0, Role-Based Access Control (RBAC)
ML / Data:	Scikit-learn, Metabase, Dalgo, Data Pipelines
Tools:	Git, GitHub, SQL Workbench, Postman, Agile/Scrum

EXPERIENCE

Software Development Engineer II Project Tech4Dev · Remote	Jun 2025 – Present
- Embedded as SDE II under the Fractional CxO program at multiple NGOs, driving end-to-end digital transformation across healthcare and rural operations. - Designed and deployed scalable AWS cloud infrastructure (EC2, S3, RDS) to host SEARCH NGO's digital ecosystem, ensuring high availability for remote, rural operations. - Built and containerised custom applications on the Frappe/ERPNext platform using Docker, digitising manual workflows and operational processes across programs. - Implemented automated data pipelines using Dalgo, enabling structured data flow from field-level collection to analytics-ready storage — reducing manual reporting effort. - Designed interactive dashboards on Metabase in collaboration with data analysts, empowering program managers with real-time insights for decision-making. - Developed Glific WhatsApp chatbot flows integrating REST APIs and WebSocket communication to streamline operations for frontline health workers. - Identified and introduced AI-driven interventions, evaluating feasibility and impact for automation and intelligent decision support across NGO operations. - Collaborated with non-technical stakeholders (program heads, field coordinators) to translate operational requirements into scalable technology solutions.	
Full Stack Developer AlgoAnalytics · Pune	Aug 2023 – Jun 2025
Led frontend development for client-facing platforms using React.js, Angular, and TypeScript, delivering 100% responsive UIs with Tailwind CSS.	

- Developed and integrated **Java Spring Boot** REST API services with frontend components, ensuring seamless end-to-end functionality.
- Implemented **JWT-based authentication** and role-based access control (RBAC) for secure user management across web applications.
- Implemented CI/CD pipelines with DevOps teams, streamlining deployment and reducing time-to-market for feature releases.
- Utilised AWS services (S3, Lambda, DynamoDB, API Gateway) for hosting, asset management, and serverless backend workflows.
- Executed website revamps that boosted visibility and user engagement by 70%, resulting in increased traffic and improved conversion rates.

Software Development Engineer

Sep 2022 – Aug 2023

Brillio · Bangalore

- Built a cutting-edge training platform using **Java** and **Spring Boot** backend with **Angular** frontend, integrated via REST APIs and SQL Workbench — increasing user engagement by 50%.
- Implemented **OAuth 2.0** and JWT authentication for secure session management and role-based access across the platform.
- Developed intricate frontend components for Sun Pharma's web properties using **React.js** and AEM (Adobe Experience Manager), delivering fully responsive designs across all device types.
- Leveraged AWS Lambda and API Gateway for cloud-based backend services, improving scalability and reducing infrastructure costs.
- Engaged with leadership teams for business research, contributing to strategic growth initiatives and accelerating delivery timelines by 50%.

Software Developer Intern

Jan 2022 – Jun 2022

Wingrow Agritech · Pune

- Designed and enhanced website UX using **React.js**, collaborating closely with backend team for API integration.
- Built Progressive Web App (PWA) architecture, resulting in a 30% increase in user engagement among farmers and vendors.

Machine Learning & Speech Processing Intern

Jul 2021 – Dec 2021

Anubhooti Solutions · Pune

- Developed a **Python**-based speech recognition model using ML libraries (scikit-learn, librosa) for gender identification from audio signals.
- Trained model on Kaggle dataset achieving **94% accuracy** on test data; applied signal processing techniques for feature extraction.

EDUCATION

B.Tech — Electronics & Telecommunication Engineering

2018 – 2022

Vishwakarma Institute of Technology, Pune

CGPA: 8.1 / 10
